(54) SMALL-SIZED INFORMATION INPUT TERMINAL
AND VIDEO TELEPHONE SET

information input terminal and the video telephone set
can be a cordless telephone set.

(57) Abstract:

COPYRIGHT: (C)1995,JPO

PURPOSE: To realize a simple remote pointing by coping with an information presentation human interface in a small-sized information input terminal and a video telephone set.

CONSTITUTION: The video information from a network is thinned on the side of a video telephone set 2, a reduction display is performed for the information on the small-sized display 15 of a small-sized information input terminal 1 and an instruction is enabled by the touch panel 16 on this screen. As a result, a simple remote pointing and a large screen pointing are realized by enabling the selection of a menu by minimizing the motions of the hands, the demand of an information presentation human interface can be coped with and the needs of a large screen video telephone set can be coped with. By providing a speaker 13 producing the sound from a microphone 11 for sound collection and a network on the small-sized information input terminal 1 and performing a communication with the video telephone set 2 by cordless via a sound transmission circuit 12 and a sound video reception circuit 14, the small-sized
